CarbonLite Technical Review Package

KACH CANADA LTD.

Report Information

Prepared for review as part of a pilot emissions data readiness and reporting workflow. This draft export is not approved, verified, certified, or

Reporting Boundary

Water is tracked as an operational metric and excluded from GHG emissions totals unless a reviewed water emission factor is provided.

Calculation Quality Summary

Records Requiring Review

Tracked Metrics

... calculated GHG emissions total. No imported activity records require review.

Regulatory Threshold Reference

Unresolved source rows have not been imported into ActivityData and are not counted as imported activity records requiring review.

Methodology and Limitations

... import methods used to create the activity records included in this pilot report. Detailed record-level source

... contributing the largest share of current estimated emissions. Hotspot analysis helps identify w

Regulatory threshold screening is not yet configured with reviewed source provenance for this jurisdiction.

Reviewed regulatory source provenance is required before threshold screening.

... Records requiring review, tracked-only metrics, missing factors, inv

CarbonLite uses one six-stage workflow: Define Reporting Boundary, Collect & Upload Source Data, Review & Resolve Data Issues, Valida

Threshold screening only. This does not constitute regulatory compliance advice.

Emissions are calculated from imported or manually entered activity data and configured emission factors. CarbonLite applies factor matchin

Top Emissions Hotspot: Electricity

Records without valid factors, units, quantities, dates, or required jurisdiction are excluded from emissions totals and listed as records requir

Electricity contributes 89.64% of calculated emissions. Consider this category for reduction planning because it represents a large share o

Source documents, source references, and factor metadata should be reviewed before using report outputs for internal, consultant, or extern

Electricity and Business Travel - Accommodation together represent 100% of calculated emissions.

This report was generated using CarbonLite Pilot Demo v0.1 for emissions data readiness and workflow review purposes only. It is not a cer
